

TYTAN PROFESSIONAL WINS Caliber 65 Graphite GUN

WINS Caliber 65 Graphite gunis a professional tool for the application of polyurethane foams, designed for precise and effective work. Thanks to the tcoating, the gun is resistant to dirt, which makes it much easier to maintain and extends its life. A modern, innovative valve allows you to control the pressure of the applied foam, which allows to precisely adjust the foam stream to the needs of the project. The ergonomic handle ensures comfort of use, and the high durability of the structure guarantees reliability during intensive assembly work.

BENEFITS

- Ergonomic use
- Teflon-coated
- Dirt-resistant
- Extended useful life

RECOMMENDED USES

- Professional foam application way for mounting window and door frames
- Precise foam application to narrow gaps

METHOD OF USE

Before application, read the technical data sheet and safety instructions given in the safety data sheet.

Product preparation

- Shake well the can.
- Screw the can tightly on the adapter. Pay attention for not to damage the thread.
- Be careful while screwing the foam cleaner on. The can is under pressure.

Application

- Press the trigger sensitively until the foam comes out smoothly. Adjust the speed of the foam stream using setting screw.
- If you make a break longer than 5 minutes, block the gun using setting screw.
- After the break, shake the can well to mix the ingredients again
- If it is necessary to change the can during the application, it should be done as soon as possible
- If there is cured foam at the end of the nozzle, it should be thoroughly cleaned.

Works after completion of application

- Fresh foam can be removed with a universal foam cleaner
- Be careful when screwing the cleaner, can is under pressure
- After hardening, the foam can be removed mechanically or with a special cleaner for hardened foam - before cleaning, test in an invisible place

TRANSPORT / STORAGE

Store in original closed packaging in dry, well-ventilated places.

SAFETY AND HEALTH PRECAUTIONS

The general rules of hygiene should be adhered. Use protective goggles and gloves. Read the manufacturer's instructions on the product. Keep out of the reach of children.
